

# SiCam Caliper-Assisted Lumber Size Control System

## Powered by LSIZE Wireless

### Benefits

- Increase Grade Outturn
- Increase fiber Recovery
- Increase Production
- Greater Profitability
- Reduce Machine Downtime
- Informative Reporting
- Stronger Teamwork
- Sustainable Competitive Advantage

### Professional Services

- Workshops
- Coaching
- Benchmarking
- Training
- Technology

### Upgrades

- Migrate Legacy SiCam
- Migrate Legacy LSIZE
- Special Offers & Prices

### LSIZE & SiCam

#### *Trusted Lumber Size Brands Unite*

Our customers tell us they want:

- The best lumber size control technology;
- Both real-time and caliper based options;
- The best installation and training services;
- To be supported with advancements, technical assistance and reliability;
- To trust their supplier is stable and will be there to back up the system over the ups and downs of the industry.

The SiCam LSIZE Caliper/Micrometer Wireless Size Control System delivers the accuracy of proven statistical quality control (SQC) techniques and the reliability of wireless technology to enhance the impact of quality control initiatives to wood products manufacturing operations.

By applying the SiCam LSIZE System on a daily, shift-by-shift basis, you'll increase the efficiency of the process, ensure that accurate data is being captured for analysis and increase the credibility of your results. With the information provided by the SiCam System — accurate detail concerning manufacturing performance — it is possible to control variation, reduce target sizes and in turn increase fiber recovery. With fiber representing one of the largest cost factors in wood manufacturing processes, those possibilities translate directly into bottom line impact. Features of the system include:

- LSIZE Software designed by sawmillers for sawmillers
- Flick of a switch between imperial and metric
- Small, durable caliper mounted LSIZE wireless interface
- Integrate caliper data to SiCam RealTime Software
- Flexible reporting - export to Excel® and Access®
- Free 24 hour, 7 day/week support from our shop
- Site training for the manufacturing team
- Team building to gain manufacturing team buy-in
