

LSIZE & SiCam - Trusted Lumber Size Brands Unite*Delivering complete lumber size control solutions today and tomorrow!*

MicroRidge and SiCam Systems are partnering to bring the best in lumber size control to the industry. Customers now have a single source for the only complete lumber size control solution from wireless caliper measuring to real-time scanning. As always, customers can expect teamwork, reliability and long-term stability from these industry leaders.

Left to Right: Todd Buchanan (SiCam), John Schuldt (MicroRidge), Mary Chisholm (MicroRidge), Nick Barrett (SiCam)

SiCam Systems now sells, delivers and supports the LSIZE caliper-based hardware and software product line in North America, Australia, New Zealand, Ireland and the United Kingdom. MicroRidge continues to develop and manufacture LSIZE, and provide direct sales and support to other countries. Both companies will continue as separate entities.

MicroRidge pioneered caliper-based lumber size control systems in 1983 with LSIZE, and is the industry leader with the largest installed base of handheld measurement collection solutions for lumber size control. MicroRidge brings its wireless technology to lumber size control with LSIZE Wireless pairing it with their industry standard, LSIZE Software for PC.

SiCam Systems designs, delivers and supports the SiCam brand of size control technologies. SiCam pioneered real-time lumber size control scanning systems in the mid-1990s and continues to lead the world today with its MPP multiple piece profile scanners.

SiCam and MicroRidge understand the importance of working in partnership to converge their core competencies to deliver on customer needs. Over 50 years of combined industry experience ensures that customers receive the best and latest solutions for lumber size control from sources they trust.
